WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/31899

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Claims NONE YES

Claims 1-11 NO

Inventive step (IS)

Claims NONE YES

Claims 1-11 NO

Industrial applicability (IA)

Claims 1-11 YES

Claims NONE NO

2. Citations and explanations:

Claims 1-11 lack novelty under PCT Article 33(2) as being anticipated by US Patent No. 6,540,777 to Stenzel. Stenzel discloses a stent that has annular segments (106) with interlocking members (112,114,116). Figures 2-4 illustrate different shapes of the interlocking members. The annular members also have connectors (126) that can be straight or configured in a U or V shape, as shown in Figure 15.

Claims 1-11 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry. The stent can be used for repair of blood vessels.
